

VEDANT TIWARI

Full Stack Developer (MEAN Stack)

+91-9407533062 | askvedant18@gmail.com | linkedin.com/in/vedanttiwari | github.com/askvedant18

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 8+ months of hands-on experience delivering production-grade web applications using the MEAN Stack (Angular, Node.js, Express.js, MongoDB) and PostgreSQL. Proven ability to design and consume RESTful APIs, implement JWT and OAuth 2.0 authentication, and deploy scalable microservices via Docker and Kubernetes on AWS and IBM Cloud. Contributed to 20%+ performance improvements and 40% faster deployments across multiple projects. Backed by 5 internships spanning DevOps, data science, and cybersecurity. Proficient in Agile/Scrum, CI/CD pipelines, unit testing (Jest), and cross-functional collaboration. B.E. in Information Science and Engineering, VTU, 2025.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL, PHP, C, C++

Frontend: Angular, React JS, RxJS, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Webpack

Backend: Node.js, Express.js, Spring Boot, Spring Security, Microservices, REST API, OOP, MVC

Databases: PostgreSQL, MySQL, MongoDB, Sequelize ORM, pgAdmin 4, Query Optimization

DevOps & Cloud: Git, GitHub, Docker, Kubernetes, CI/CD Pipelines, AWS, IBM Cloud, Linux, Bash Scripting

Testing & Tools: Jest, Jasmine, Postman, Swagger, OpenAPI, JWT, OAuth 2.0, Agile, Scrum, SDLC

Concepts: Data Structures, System Design, Role-Based Access Control, OWASP Web Security, Performance Optimization

WORK EXPERIENCE

Poorit Technology | Full Stack Developer

Aug 2024 – Present (8 months)

- Develop and maintain 3+ production-grade full-stack web applications using Angular (frontend) and Node.js/Express.js (backend) with PostgreSQL, consistently delivering features on time across bi-weekly Agile/Scrum sprints.
- Designed and maintained 10+ RESTful APIs with JSON data interchange; optimized PostgreSQL schemas in pgAdmin 4, reducing query execution time by 25%; conducted peer code reviews using Git branching workflows.
- Core contributor to Poorit IntelliTest Hub – an intelligent testing and assessment platform – handling module architecture, Jest unit testing, Swagger API documentation, and deployment.
- Improved application reliability by implementing comprehensive Jest unit test suites, achieving 80%+ code coverage across core modules and reducing post-deployment bugs significantly.

INTERNSHIP EXPERIENCE

Rooman Technologies Pvt. Ltd. | DevOps Engineer Intern

Sep 2024 – Feb 2025

- Built and maintained CI/CD pipelines using Docker and Kubernetes, reducing deployment time by 40%; deployed AI models to AWS and IBM Cloud using Linux and Bash automation scripts.

Zidio Development Pvt. Ltd. | Full Stack & Data Science Intern

Oct 2024 – Dec 2024

- Developed a Python-based face recognition module with REST API integration and an AI-powered task optimization tool, improving team workflow efficiency by 30%.

ApexPlanet Software Pvt. Ltd. | Web Developer Intern

Aug 2024 – Sep 2024

- Built and optimized 5+ full-stack PHP/MySQL web applications for real-time client projects, improving page load performance by 20% through SQL query optimization and frontend caching.

ParvaM Software Solution | Web Developer Intern

Oct 2022 – Nov 2022

- Built responsive frontends using HTML5, CSS3, and JavaScript (ES6+) for 3 live client projects; reduced UI bugs by 35% through systematic cross-browser debugging and code review.

PROJECTS

Poorit IntelliTest Hub | Poorit Technology

Ongoing

Stack: Angular, Node.js, Express.js, PostgreSQL, Jest, Swagger, Git, npm

- Built a full-stack intelligent testing and assessment platform following SDLC and Agile methodology; Angular frontend consuming Node.js/Express.js REST APIs with JSON data interchange.
- Designed PostgreSQL schema for test, user, and result data; implemented Jest unit testing and Swagger API documentation; managed codebase using Git with team branching workflows.

Crypto Trading Platform with AI Chatbot

Final Year Project | Team of 4

Stack: React JS, Spring Boot, Spring Security, MySQL, JWT, OAuth 2.0, Gemini API, Razorpay, Docker, CI/CD

- Architected a scalable full-stack cryptocurrency trading platform with real-time market data, AI Chatbot powered by Gemini API, and secure Razorpay payment gateway integration.
- Implemented JWT and OAuth 2.0 authentication with role-based access control using Spring Security; deployed via Docker with CI/CD pipeline on GitHub following SDLC best practices.

EDUCATION

Bachelor of Engineering – Information Science & Engineering

Oct 2021 – May 2025

RRIT, Visvesvaraya Technological University (VTU), Belagavi | Score: 75%

Kendriya Vidyalaya Dhana, Madhya Pradesh | Class XII: 83% | Class X: 67%

CERTIFICATIONS

- AI-DevOps Engineer – Rooman Technologies
- Cloud-Native Application Development with IBM Cloud and Kubernetes – IBM
- Data Science and Analysis – Zidio Development
- AWS for Beginners – Amazon Web Services
- Introduction to Artificial Intelligence – IBM / Coursera
- Java Full Stack Development – Tap Academy
